

Element™ Welding Helmet with Auto Darkening Filter

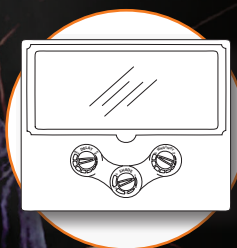

The Element Welding Helmet provides the first high-quality, economical solution to the marketplace!

The Element Welding Helmet is perfect for every welder, from the weekend warrior to the everyday welder! The rugged, light-weight welding shell, only 6 oz, is ideal for all-day wear. The shape of the shell is designed to eliminate hot ambers from sitting on the shell, thus protecting the welder from injury. The Element is available with two different Auto-Darkening Filters to fit your unique preferences: ADF Fixed Shade 10 and ADF Variable Shade 9-13.

Element™ Shade 10

- Shade 10 ADF
- 2 Independent Arc Sensors
- Standard Shade 3
- Lens speed less than .005 micro second
- Solar Powered Unit
- Cartridge Size 90 x 110mm
- Viewing Area 42 x 96mm

Element™ Variable

- Adjustable Shade 9-13
- 2 Independent Arc Sensors
- Standard Shade 4
- Lens speed less than .005 micro second
- Adjustable delay 0.1 - 0.9 seconds
- Solar Powered Unit
- Cartridge size 90 x 110mm
- Viewing area 42 x 96mm
- Suggested with MIG, TIG and Stick welding
