## Applications

- Glass Handling
- Painting
- Fabrication
- Assembly
- Sheet Metal
- Canning
- Steel Manufacturing and Handling

### KEVLAR®

Sleeves manufactured with DuPont™ KEVLAR® brand fiber provide exceptional cut, slash and heat resistance.

- 100% KEVLAR® brand fiber is five times stronger than steel on an equal weight basis providing excellent protection from cut, slash and abrasion hazards.
- KEVLAR can withstand temperature up to 900° F (480° C) without breaking down, providing excellent flame resistance.
- Soft and flexible knit is lightweight, snug fit conforms to arm for less obstruction.
- Styles with thumb hole hold sleeve in place, offering increased protection in the palm area.

## TuffShield®

Cut resistance combined with low-linting properties make TuffShield sleeves excellent for food processing and other industries where product protection is essential.

- Superior Cut Protection – TuffShield utilizes a proprietary engineered fiber process to incorporate up to 25% more Spectra® fiber than other leading brands. Made with Spectra and abrasion-resistant filaments around a fiberglass core, the Spectra Guard™ fiber is light-weight, low-lint, and does not easily absorb liquids. This highly coordinated wrap is ten times stronger than steel on an equal weight basis, providing enhanced cut resistance and durability, while offering an ASTM cut level 4 for advanced protection.
