

# TuffShield®

# TuffShield® Series by Perfect Fit®

### Applications:

- Food Processing
- Food Packaging
- Meat and Poultry Industries
- Restaurant
- Commercial Fishing
- Canning

## TuffShield®

Cut resistance combined with low-linting properties make TuffShield gloves excellent for food processing and other industries where product protection is essential.

- Comfortable – Soft, seamless knit design eliminates uncomfortable seams that can rub or chafe.
- Superior Cut Protection – TuffShield utilizes a proprietary engineered fiber process to incorporate up to 25% more Spectra® fiber than other leading brands. Made with Spectra and abrasion-resistant filaments around a fiberglass core, the Spectra Guard™ fiber is light-weight, low-linting, and does not easily absorb liquids. This highly coordinated wrap is ten times stronger than steel on an equal weight basis, providing enhanced cut resistance and durability, while offering an ASTM cut level 4 for advanced protection.
- Launderable – Products withstand laundry-room caustics up to pH 15 and water temperatures up to 180° F (80° C). They may be repeatedly bleached or disinfected without harm and will not discolor.
- PowerCuff™ System – Unique cuff material that eliminates cuff “blow out” from repeated laundering, color coded for rapid sorting.

*§TuffShield gloves are not cut or puncture proof, not recommended for moving or serrated blades.*

STYLE	SIZE	DESCRIPTION
PF13	XS-XL	13 CUT, LIGHTWEIGHT SPECTRA GUARD™, WHITE
PF13-GY	XS-XL	13 CUT, LIGHTWEIGHT SPECTRA GUARD, GRAY
PF10	XS-XL	10 CUT, MEDIUM WEIGHT SPECTRA GUARD, WHITE
PF10-GY	XS-XL	10 CUT, MEDIUM WEIGHT SPECTRA GUARD, GRAY
HPF7	XS-XL	7 CUT, HEAVYWEIGHT SPECTRA GUARD, WHITE
HPF7-GY	XS-XL	7 CUT, HEAVYWEIGHT SPECTRA GUARD, GRAY
PF13-(size)-SS	XS-XL	13 CUT, LIGHTWEIGHT SPECTRA GUARD WITH STAINLESS STEEL, WHITE

Small	Orange
Medium	Yellow
Large	Blue
XLarge	Green

## TuffShield® Antimicrobial

The technology of the TuffShield series blended with AlphaSan®, a silver-based antimicrobial agent, prevents microorganisms from degrading the product and helps inhibit the growth of bacterial odors.

- Antimicrobial properties also resist product discoloration and inhibit the growth of bacterial odors – extending the life of the glove.
- Layered composite technology used in the lightweight glove style combines Spectra Guard™ fiber and a fine strand of stainless steel on the outside of the glove with a combination of a Lycra®/Spandex blend on the inside of the glove to produce extremely effective cut protection while offering a comfortable fit for the wearer.
- Medium weight style offers an extended 3" cuff for additional protection at the wrist.
- Ambidextrous design extends glove life.
- ANSI/ASTM cut level 4 protection.
- Single Solution – Suitable for knife-hand and off-hand use.
- Product withstands commercial laundry-room detergents and cool water temperatures up to 120° F (49° C). Lower heat settings (up to 180° F) are suggested for drying as extreme heat may cause shrinking and degradation of fiber. The product may be repeatedly bleached with diluted solution or disinfected without harm and will not discolor.
