

4-1/2" Roughneck® Weld Cleaning Brush

New!

High Performance Stringer Bead Brush for Mini-Grinders

Although 4-1/2" is the most popular size of small angle grinder, welders and fabricators using this tool have traditionally been limited to 4" diameter stringer bead wheels for surface preparation, root-pass weld cleaning and inter-pass weld cleaning.

Weiler is proud to introduce a new, high performance option specifically for use on 4-1/2" mini-grinders.

Designed for the greatest cleaning action and longest product life on small angle grinders, this new addition to our line of Roughneck weld cleaning brushes features a high knot count and a short trim length. This design results in the following:

- A 35% improvement in cleaning action versus comparable 4" stringer bead brushes.
- Up to 20% less wire loss than comparable 4" stringer bead wheels and 50% longer brush life.
- Superior cleaning action and longer product life than other currently available 4-1/2" stringer bead wheels.

The new 4-1/2" Roughneck is available in both carbon steel and Type 302 stainless steel wire, with a variety of arbor hole options.

Welders and fabricators now have a better option for their 4-1/2" angle grinders.

Stringer Bead Knot Wire Wheel Brushes - For hard-to-reach areas; primarily used for hot-pass weld cleaning.
